EXPERIENCE

AI Technical Founder/Co-founder

<https://wofoware.com>

11/2023 - now Remote

- **Conci** – middleman service to connect homeowners and contractors. Communication Agents for voice and messaging and Autonomous AI Agents for CRM management
- **ReQQ** - Formal requirements quality assessment.
- **Stoky** - Autonomous quantitative researcher with telegram bot frontend and access to stock market data providers.

Chief Technology Officer

levvr.io

10/2022 - 09/2023 Netherlands · Remote

- Led and safeguarded the company's technology and AI strategies for the next 12 months, initiating the development of AI 2 features now in the proof-of-concept stage.
- Expanded the team 2.5 times by incorporating more in-house developers and contractors for non-core development tasks.
- Implemented DORA metrics, enhancing development velocity by 3 from medium to high/elite levels.

Solutions Architect

levvr.io

08/2021 - 09/2022 Netherlands · Remote

- Introduced behavior-driven testing to a legacy codebase, improving testing orientation and reducing production errors by 30%.
- Orchestrated the creation of a multi-environment backup and restore strategy, strengthening data security and reliability; accelerated data restoration into client accounts, cutting onboarding time by 50%.

Big Data Architect

[DLIMI Datalyze](#)

10/2021 - 12/2022 Denmark · Remote

- Remotely performed comprehensive analysis of legacy systems.
- Designed an architecture for transitioning legacy RDBMS and ETL/curation processes to the cloud.
- Executed a proof of concept for Delta Lake-based storage and workflow. Suggested efficient methods to monitor curation processes, saving time and effort.

AI/ML videos and articles

Introduction to Digital Twins

<https://dzone.com/articles/ml-from-monolith-to-microservices-and-data-flows> ML: From Monolith to Microservices and Data Flows

ACHIEVEMENTS

- Initialized creation of synth data for image recognition-based ML project. The main ML team was able to start the project in days not months, before hardware deployed.
- Led the deployment of an RTLS IIoT prototype to a remote Siberian site in just 3.5 months, assembling and guiding the team from the ground up.
- Converted a legacy codebase to a mono-repo and cloud-native solution with advanced CI/CD pipelines, slashing developer onboarding time by 90% and boosting deployment frequency by 500%.
- Directed sales and development teams over a decade, delivering business process automation that pleased top-tier Russian clients.

SKILLS

AI / GAI / ML

Infrastructure : [Kubernetes](#) [Terraform](#) [Pulumi](#) [Gitops](#) [Dapr/Aspire](#)

Big Data : [Kafka](#) [Delta Lake](#) [Spark](#) [Data Lake](#) [Clickhouse](#)

IioT : [MOTT](#) [stream/video processing](#) [Azure IoT](#)

Languages : [C# \(.net\)](#) [Python](#) [TypeScript \(Next.js, React\)](#)

EXPERIENCE

Technical Architect

[Detego](#)

📅 03/2021 - 05/2022 📍 Europe · Remote

- Orchestrated the migration of legacy systems to the cloud.
- Revitalized and directed a data engineering team, enhancing big data pipelines with monitoring, read-only storage solutions, and partial migration to a Delta Lake architecture reducing infrastructure costs by 15%.

Enabled the development of new features by presenting diverse architectural solutions to stakeholders and product owners. Including novel architecture for IoT stream processing, tailored to meet the expanding needs of growing customer base

Chief Technology Officer

[Vympel \(IIoT startup\)](#)

📅 09/2019 - 12/2020 📍 Moscow, Russia

- Built a diverse development team of 15 from scratch to create a cloud-native software solution with edge components for a Real-Time Location System (RTLS) application.
- Initiated the development of custom hardware to improve indoor and outdoor positioning by 175%.
- Collaborated with contractors to implement bespoke machine learning algorithms and a digital twins architecture achieving 1-2 sec data latency.
- Developed and executed a solution architecture for enterprise epidemiological control, incorporating mobile apps for GATT/iBeacon contact discovery and thermal cameras for Elevated Body Temperature monitoring.
- Integrated Camunda BPMS to enforce epidemiological protocols both for ongoing COVID19 pandemic and future seasonal flues.

Solution Architect | Interim CTO
